SPEAKER WALL MOUNT

Swivel & Tilt Speaker Wall Mount

The **TVARMSP01** is the ideal speaker wall mount for speakers weighing up to 3.5kg, installing to the single thread or one of the double threads of the speakers. The arc-shaped adjusting structure allows tilting 20° up and down, 70° left and right, which can be fixed into the desired position by tightening or loosening the screw up on the arc-shaped structure. Adjusting Control with screwing tools ensures all adjustments achievable while space is limited between the rear of the speakers and the wall. The mount puts the speakers 60mm from the wall when fully stretched.

Material:	Nylon
Color:	Black
Dimensions:	60x87x47.5mm
