TELEVISION

## SOUND BAR BRACKET

Mounting Above or Under  
32"-70" TVs

The **TVARM-SB01** is made from high quality steel to hold sound bars up to 15kg. It is suitable for most SONOS, SONY & VIZIO soundbars, and, can be easily attached to TV wall brackets or TVs on the stands directly instead of mounting to wall and leaving ugly screw marks. It stylishly connects to TV wall brackets or directly to the TVs on stands, instead of mounting to wall. The mount is ideal for hanging on a corner or on an articulating mount where the sound can face the same direction with the TV to make perfect auditory and visual experience. The sound bar brackets can be mounted with standard VESA 200X100 to 600X400.
