BEYOND DIGITAL SIGNAGE

SPACE
DIGITALSIGNAGE

Any player. Any screen.*
Unique usability. Unlimited scalability.

POWERED BY **WAAPITI**

Start playing your own content in just a few clicks

Discover the SPACE Digital Signage Waapiti platform: cloud-based software, serverless and scalable. A human-friendly and intuitive interface to distribute content everywhere. The platform is 100% responsive and adapts to any device. Define your campaign, create your channel and start communicating!

✓ Create HTML content easily, simply adding your own pictures and text. Adapted to several layouts!

✓ Upload and manage your content easily, and organize it using tags or creating playlists.

✓ Tag content and players by different criteria and create playlists and schedules automatically.

✓ Show content on your screen with live data from websites, social networks, video streams, or any other online data source.
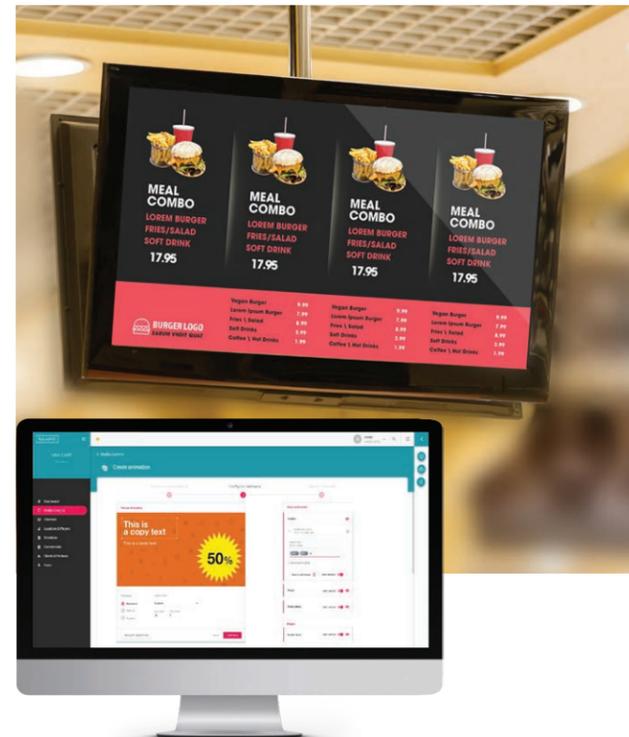

SPACE
DIGITAL SIGNAGE

Transforming spaces into unique experiences

Digital signage is a great way to advertise and is also a fantastic method of getting customers to interact with your business. Plus, once you've invested in one, they are low maintenance and won't require you to break the bank!

In the world of all things digital, businesses shouldn't miss out of this highly effective way of attracting and connecting with customers.

Turn your digital signage into something more than just a display and go further than just trying to sell a product.

## SPACE Digital Signage allows you to easily display & manage images, videos, websites & more

Space Digital Signage connects **everywhere**

The Space Digital Signage, powered by WAAPITI is a cloud based digital signage platform which connects everywhere allowing you to engage with your customers across multiple screens.

1 **Annual Licence:**
Simply sign-up for a Waapiti Annual Licence, download the app to your SmartTV & start building your next in-store campaign. A single licence allows you to wirelessly push your signage over multiple Smart displays.

2 **Signage Player:**
No SmartTV - no problem! Connect your Waapiti Digital Signage Player to the Cloud Platform and run your own designed signage campaigns via HDMI to your signage displays. The Waapiti Digital Signage Player comes bundled with an Annual Licence and all required software pre-installed.

1 **WAAPITI Cloud Platform**
Content Design and Management

WAAPITI

Broadcast and Distribute via WAAPITI Cloud Content to Multiple Smart Screens*

Connect the WAAPITI Player to Multiple Smart Screens* allowing for easier installation without cables.

2 **WAAPITI Player**
Content Playback

Connect the WAAPITI Player via HDMI and Distribute to Multiple Screens*

*   The WAAPITI standalone player allows for connecting to multiple screens, depending on the A/V installation.
*   Each WAAPITI Player Licence allows for distribution of up to five screens, additional licences will be required for extra screens.
*   The WAAPITI Platform is compatible with most of the devices from the main manufacturers on the market, and operating systems.

SPACE™ TELEVISION

MANAGE COMMUNICATE INTERACT

The content management
platform that supports any display

The SPACE Digital Signage, powered by Waapiti, is a web-based, serverless and scalable platform. Human-friendly and intuitive interface to distribute content everywhere. Waapiti powers any type of display; projectors, video walls, touchscreens, mobile devices, electronic shelf labels or LED panels.

Using the Waapiti platform allows you to easily manage screens at multiple geographical locations, group your screens by room, and update content schedules without breaking the budget.

Plug & Play
Connect players to any display and start playing content instantly.

Scales up
Add players and tag them easily to create schedules for each player.

Automatic updates
Receive software updates and improvements without any intervention from your side.

Store & forward technology
Downloaded contents and schedules keep playing, even during connectivity issues.

Network monitoring
Check the status of your players network.

Video scaler
Automatically scales content. No need for an extra scaler.
